Continuation of Disposition of Claims: Claims subject to restriction and/or election requirement are 1,3-13,15-22,24-30,32-37,39-49,51-58,60-70 and 72-78.

DETAILED ACTION

Status of Claims

1. This communication is responsive to amendment filed on January 4, 2007, where applicant amended claims 1,3,5,7,8,10-12,15-22,27,30,37,44,47,58,65,68. Claims 1,3-13,15-22,24-30,32-37,39-49,51-58,60-70,72-78 are pending.

Response to Amendment

2. Applicants amendment filed 1/4/2007 has been considered. In light of the amendment, the claims more clearly demonstrate two distinct inventions. Therefore a restriction requirement for further examination is presented below.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I.* Claims 1,3-7,10,22,24-26,29,37,39-43,46,58,60-64,67, drawn to encrypting a message for secure transmission, classified in class 709, subclass 206.
 - II.* Claims 8,9,11-13,15-21,27,28,30,32-36,44,45,47-49,51-57,65,66,68-70,72-78, drawn to retrieving a decrypted stored message, classified in class 709, subclass 219.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions *I* and *II* are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the

Art Unit: 2157

subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the steps involved in sending an encrypted message for a secure transmission (and demonstrated in figure 5A of Applicants disclosure) is not dependent upon the steps involved in retrieving a decrypted message that is stored in a server (and demonstrated in figure 5B of Applicants disclosure). The subcombination has separate utility such as retrieving a decrypted message that is stored in a server.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

5. Because these inventions are distinct for the reasons given above and have attained recognition in the art as a separate subject of inventive effort as demonstrated by their different classification and thus requiring a separate field of search for each invention, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2157

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A SHORTENED STATUTORY PERIOD FOR RESPONSE TO THIS ACTION IS SET TO EXPIRE THIRTY DAYS FROM THE MAILING OF THIS COMMUNICATION. FAILURE TO RESPOND WITHIN THE PERIOD FOR RESPONSE WILL CAUSE THE APPLICATION TO BECOME ABANDONED (35 USC § 133). EXTENSION OF TIME MAY BE OBTAINED UNDER PROVISION OF 37 CFR 1.136(A).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ramy M. Osman whose telephone number is (571) 272-4008. The examiner can normally be reached on M-F 9-5.
